

# ENDPOINT PROTECTION STANDARD

ENJOY SAFER TECHNOLOGY™

Whether your business is just starting or established, there are a few things you expect from security software you use daily. At ESET, we feel that running security software in the business environment should be easy and simple. That's why we have created ESET Business Solutions, a perfect match for any size business – utilising our 25 years experience pioneering the antivirus industry.

**Simple and Straightforward**

With ESET Business Solutions you can mix and match endpoint protection according to your actual needs, deploying it on a range of platforms (Windows, Mac, and Linux) and devices: computers, smartphones, tablets, and servers.

**Light on Your System**

Our solutions are built for small footprint, which also makes them suitable for older hardware, saving IT-related costs on hardware upgrades. In addition, program updates are small and can download from a central mirror server.

**Easy to Manage**

Easily deploy, configure and manage your security software from a single console. It no longer takes a bunch of IT professionals to run your company's IT security – but from our remote management console your company security can be tweaked to every last detail.

**ESET Endpoint Protection Standard**

Keep your network clean and protect your endpoints (computers, smartphones, tablets, and fileserver) against emerging threats. ESET Endpoint Protection Standard provides essential protection for the company network that is easily manageable from a single console.

**ESET Endpoint Protection Advanced**

In addition to ESET Endpoint Protection Standard, the Advanced version comes with the powerful Web Control, Firewall and Anti-Spam filter to provide additional layers of protection for the company network and your mobile workforce.

**ESET Secure Business**

Eliminating email-borne threats at the server level, ESET Secure Business gives your company's data an extra level of security that complements the protection of computers, mobile devices and file servers.

**ESET Secure Enterprise**

Choose this option if you operate your own Internet gateway server to safeguard your HTTP and FTP communications. In addition, ESET Secure Enterprise gives you all the products and tools for the maximum level of protection on your endpoints and servers across multiple platforms.

## ENDPOINT PROTECTION STANDARD

### ESET Endpoint Antivirus

ESET NOD32 Antivirus Business Edition for Mac OS X

ESET NOD32 Antivirus Business Edition for Linux Desktop

ESET Endpoint Security for Android

ESET Mobile Security Business Edition

ESET File Security for Microsoft Windows Server

ESET File Security for Microsoft Windows Server Core

ESET File Security for Linux / BSD / Solaris

ESET Remote Administrator

See the following pages for benefits and features of the products that are color-coded in grey.

Product features may vary depending on operating system. Please consult the individual product pages at [www.eset.com](http://www.eset.com) for specific product features.

### Antivirus and Antispyware

Eliminates all forms of threats, including viruses, rootkits, worms and spyware, keeping your network protected online and off. ESET's cloud-powered reputation database increases scanning speed and minimises false positives.

### Host-based Intrusion Prevention System (HIPS)

Provides tamper protection and secures the system registry, processes, applications and files from unauthorised modification. You can customise the behavior of the system down to every last detail and detect even unknown threats based on suspicious behavior.

### Device Control

Lets you block unauthorised media and devices based on pre-set rules and parameters. Set access permissions (read/write, read, block) for individual media, devices, users and groups.

### Auto-Scan of Removable Media

Automatically scans USBs, CDs, and DVDs for threats upon insertion to eliminate autorun and other removable risks. Choose from these scanning options: start automatically/notify (prompt user)/do not scan.

### Cross-platform Protection

Exchange files and email attachments among Windows, Mac and Linux endpoints with confidence that malware targeting any of these platforms will be automatically detected and eliminated. Prevent Macs from turning into carriers of malware in the company network.

### Low System Demands

Leaves more system resources for programs you use daily. Our software also runs smoothly on older hardware, saving your time and costs of having to upgrade your endpoints.

### Multiple Log Formats

Save logs in common formats - CSV, plain text, or Windows event log for immediate analysis or harvesting. Take advantage of data being readable by 3rd party SIEM tools; RSA enVision is supported directly via a plug-in.

### Update Rollback

Revert virus signature and module updates to a known good state in case of encountering system incompatibilities. Opt to freeze updates temporarily or until manually changed.

## ENDPOINT PROTECTION STANDARD

ESET Endpoint Antivirus

ESET NOD32 Antivirus Business Edition for Mac OS X

ESET NOD32 Antivirus Business Edition for Linux Desktop

### ESET Endpoint Security for Android ESET Mobile Security Business Edition

ESET File Security for Microsoft Windows Server

ESET File Security for Microsoft Windows Server Core

ESET File Security for Linux / BSD / Solaris

See the previous and following page(s) for benefits and features of the products that are color-coded in grey.

Product features may vary depending on operating system. Please consult the individual product pages at [www.eset.com](http://www.eset.com) for specific product features.

<b>Remote Lock</b>	Locks lost or stolen devices by a remote SMS command. After locking, no unauthorised person will be able to access data stored on the device.
<b>Remote Wipe</b>	Safely deletes all contacts, messages and data on removable memory cards. Advanced cleaning procedures ensure that it is not possible to restore wiped data (Android 2.2 and higher).
<b>GPS Localisation</b>	Remotely locates the phone using a remote SMS command and tracks the phone's GPS coordinates.
<b>SIM Matching</b>	Stay in control of your company smartphones remotely, even when an unauthorised SIM card is inserted. The Admin Contacts phone numbers will receive a wealth of information about the inserted SIM, including the phone number, IMSI and IMEI codes.
<b>Admin Contacts</b>	Set up one or more Admin Contacts for your company mobile fleet to receive all the important information in the event of a loss or theft.
<b>Call Blocking</b>	Blocks calls from unknown or hidden numbers and also calls to unwanted numbers. Define a list of allowed/blocked contacts and keep your phone bills under control.
<b>Uninstall Protection</b>	One password controls it all. Only authorised persons will be able to uninstall ESET Endpoint Security for Android (version 2.2 and higher).
<b>SMS/MMS Antispam</b>	Filters out unwanted SMS/MMS messages. Allows you to define custom blacklists/whitelists or simply block all unknown numbers.
<b>Real-time Protection</b>	Protects all applications, files and memory cards with the ESET NOD32 proactive technology optimised for mobile platforms.
<b>Security Audit</b>	An on-demand security audit checks the status of all vital phone functions, including battery level, Bluetooth status, home network, disk space and running processes.
<b>On-access Scanning</b>	Advanced scanning protects company smartphones and tablets from threats attempting to access the system via Bluetooth or Wi-Fi.
<b>On-demand Scanning</b>	On-demand Scanning provides reliable scanning and cleaning of integrated memory and exchangeable media. Scanning of specific folders is also supported.
<b>Remote Administration</b>	Enables you to check the security status of your smartphone fleet, run on-demand scans, push security policies and set uninstall password. Get overview of the platforms, OS versions and other information and stay up-to-date on your smartphones' security.
<b>Administrator Message</b>	Allows administrator to push a message to the device with custom text via ESET Remote Administrator. The message priority can be set to normal, warning or critical warning.

## ENDPOINT PROTECTION STANDARD

ESET Endpoint Antivirus

ESET Remote Administrator

See the previous and following page(s) for benefits and features of the products that are color-coded in grey.

Product features may vary depending on operating system. Please consult the individual product pages at [www.eset.com](http://www.eset.com) for specific product features.

### Antivirus and Antispyware

Eliminates all types of threats including viruses, rootkits, worms and spyware.

Provides real-time on-access scanning of the server-stored data.

ESET Self-defense prevents malware and unauthorised users from disabling the security of the system.

Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact.

### Cross-platform Protection

Eliminates malware targeting all platforms, including Windows, Mac and Linux operating systems.

Prevents malware from spreading from one platform to another.

### Low System Demands

Delivers proven protection while leaving more system resources for the server's vital tasks.

### Smooth Operation

Identification of user accounts used in infiltration attempts.

Password protected uninstallation.

Automatically excludes critical server files.

Automatically detects server roles to exclude critical server files like data stores and paging files from on-access scanning to decrease overhead.

## REMOTE ADMINISTRATOR

The ESET Remote Administrator tool comes standard with each version of ESET Business Solutions.

Product features may vary depending on operating system. Please consult the individual product pages at [www.eset.com](http://www.eset.com) for specific product features.

<b>Remote Administration</b>	Manage all servers, endpoints, and even smartphones and virtual machines from a single console. Support for IPv6 infrastructure makes management of network security even easier. The comprehensive console interface lets you view all security-related events, including logs from antivirus, firewall, web control, device control and others.
<b>Real-time Web Dashboard</b>	Access web-based dashboard from anywhere for quick at-a-glance security status using live streaming of data. Customise the information displayed on the dashboard to get the most up-to-date information on the security status from the server and clients.
<b>Role-based Management</b>	Assign privileges to different remote administration users and delegate responsibilities accordingly. The built-in password strength checker and audit functionality ensure that administrator accounts are properly secured.
<b>Dynamic Client Groups</b>	Create dynamic and static client groups for easier policy enforcement and to address any pressing issues. Select from these parameters for groups: operating system, client name mask, IP mask, recent threat detected, and many more. Clients are moved automatically to the corresponding group if parameters change.
<b>Event Notifications</b>	Specify log and report parameters or choose from more than 50 templates. Have notification sent immediately or in batches based on custom threshold for security-related events.
<b>Randomised Task Execution</b>	Minimises AV storms on virtual endpoints and reduces resource contention on networked drives. Random task execution helps offset the effect of simultaneous system scans on the network performance.
<b>Local Update Server</b>	Have all clients update from a local mirror server and minimise Internet bandwidth usage. For your mobile workforce define policies to update from ESET online servers when outside of home network. The local update server supports secured (HTTPS) communication channel.
<b>Update Rollback</b>	Revert virus signature and module updates to a known good state in case of encountering system incompatibilities. Opt to freeze updates temporarily or until manually changed.
<b>Postponed updates</b>	Opt to download from 3 specialised update servers: pre-release (beta users), regular release (regular users) and postponed release (approx. 12 hours after regular release). Apply antivirus updates to non-critical systems first, followed by critical ones with the option of clearing the update cache.
<b>Microsoft NAP Support</b>	Helps resolve compliance issues with company network access policy. You can set compliance requirements such as age of virus database, antivirus product version, protection status, availability of antivirus protection, as well as firewall status – and force database updates.
